

VII.b.3.2. CONSUM D'ELECTRICITAT PER MUNICIPIS. Facturació 1997-2016

Aquest indicador recull informació sobre l'energia elèctrica facturada als diferents municipis de Menorca.

Dels resultats obtinguts es comprova com l'energia consumida ha anat en augment en el global de l'illa al llarg de la història fins arribar a l'inici de la crisi l'any 2008, quan es produeix un canvi de tendència. Analitzant les dades municipals, s'observa que aquesta tendència es dona també a cada municipi per separat. Ara bé, el 2015, per primer cop des de 2008, s'observa un augment generalitzat en el conjunt de l'illa de l'energia elèctrica facturada respecte de l'any anterior (Gràfic 1).

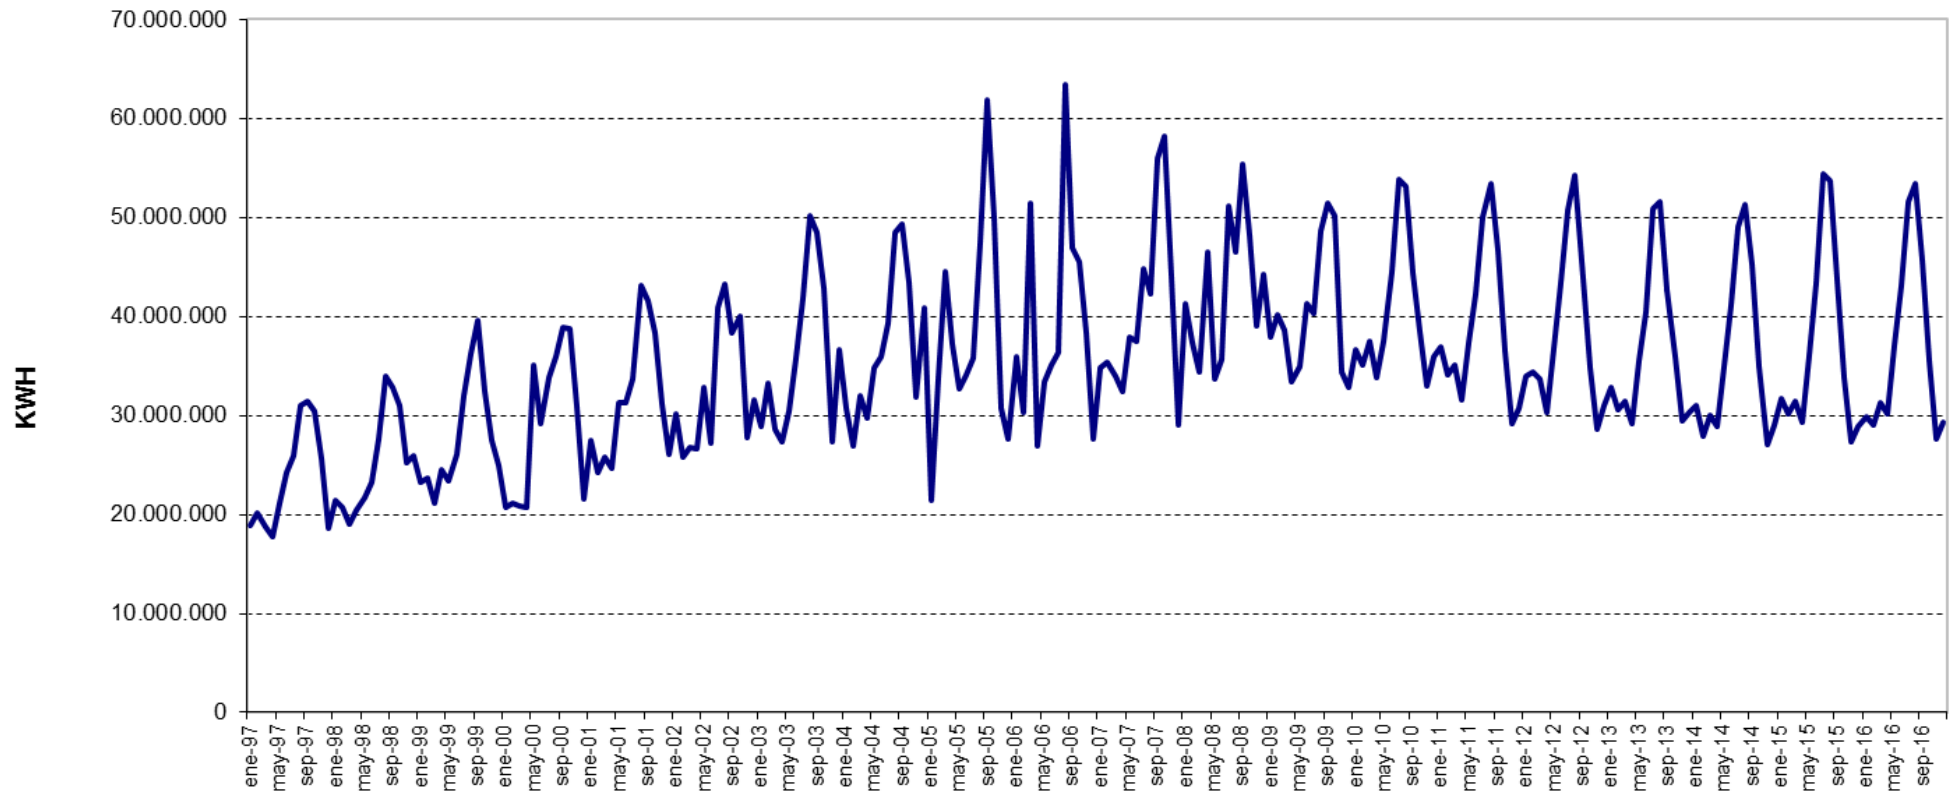

Els municipis amb consum més elevat són Ciutadella en primer lloc, seguit de Maó, a conseqüència de ser els municipis més poblats. Amb un consum molt menor es troben la resta de municipis, entre els que destaquen Ferreries i es Migjorn Gran com els municipis amb menys consum elèctric (Gràfic 3 i 4). Analitzant el consum mensual es comprova que el consum elèctric, igual que la resta de vectors ambientals, té una clara estacionalitat a causa del turisme (Gràfic 2).

Gràfic 1. Evolució del consum elèctric anual al conjunt de l'illa. 1997-2016

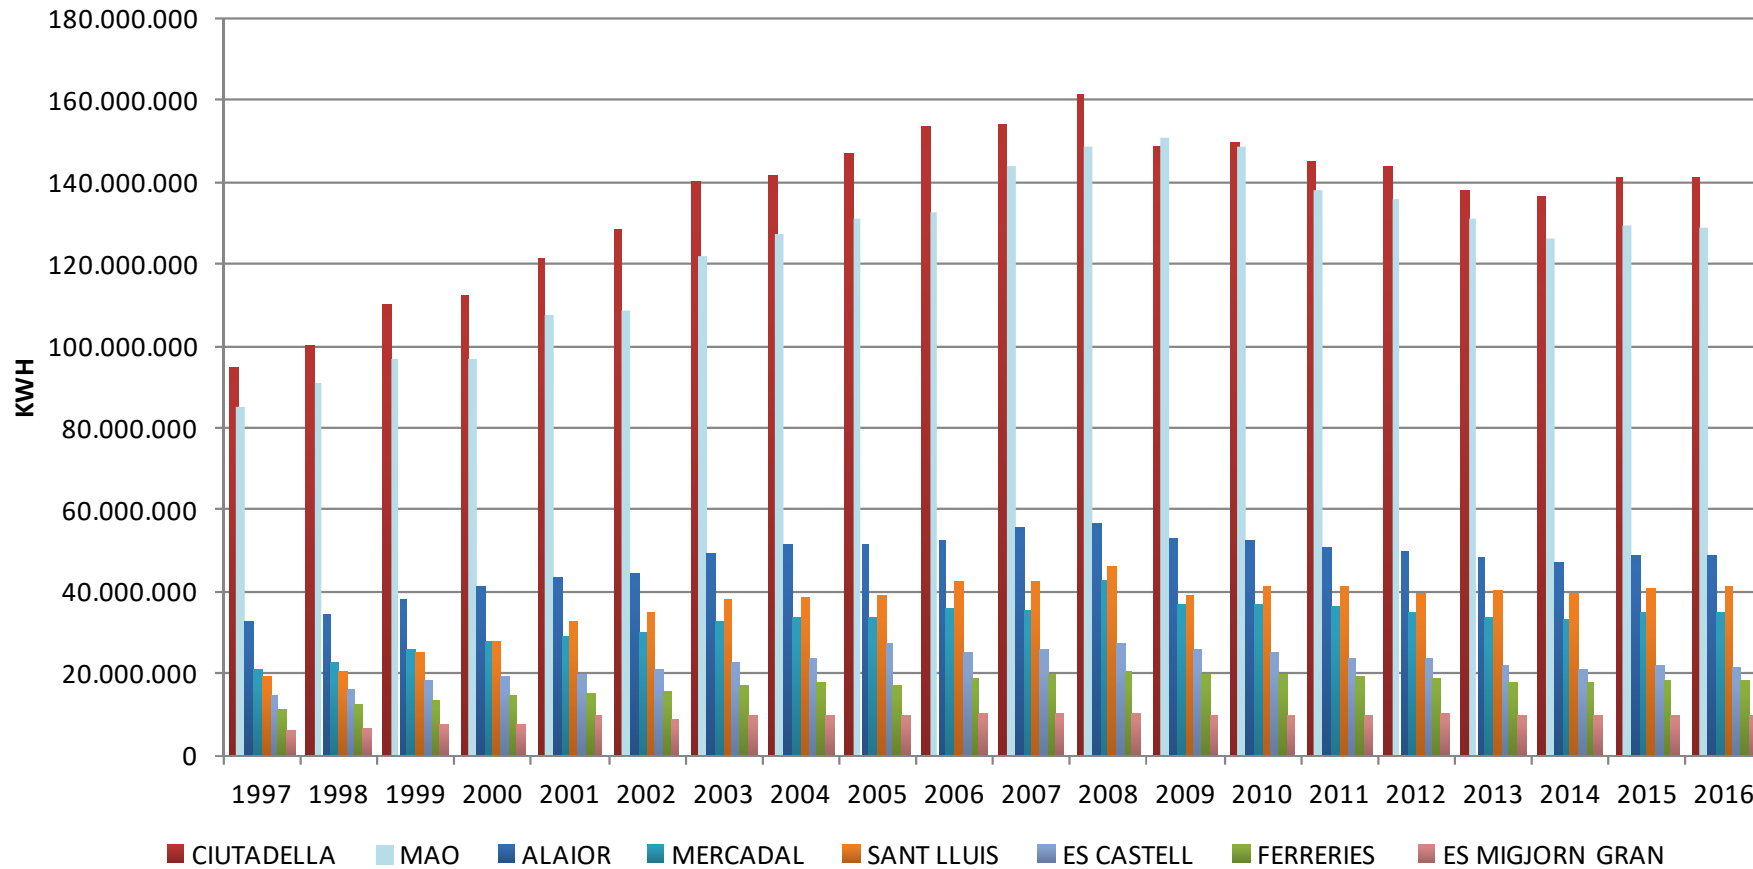

Font: GESA-ENDESA. Elaboració: OBSAM. Unitats: MWh.

Gràfic 2. Evolució del consum elèctric mensual al conjunt de l'illa. 1997-2016
